FSI[®] DAP448 containment pool pictured

The FSI[®] F-EM-183 is the original Mitico™ DH-40-4PH hazmat decon spray hoop: a portable, 4-piece gross-decontamination hoop in durable, lightweight, corrosion-free aluminum pipe and tube. It connects to a single ¾" (19 mm) GHT water supply and delivers an approximate flow rate of 4.5 GPM at 40 psi inlet pressure through 8 shower heads. Use the full hoop for single-patient personnel decontamination, or remove up to 3 sections to wash down equipment or any oddly shaped object, keeping the water-input section in the configuration.

SPECIFICATIONS

Configuration	4-piece spray hoop (DH-40-4PH)
Construction	Durable, lightweight, corrosion-free aluminum pipe & tube
Water inlet	¾" (19 mm) GHT threaded
Shower heads	8
Flow rate	Approx. 4.5 GPM at 40 psi inlet pressure
